### ALL COMBUSTION ENGINES NEED CLEAN AIR FOR OPTIMUM PERFORMANCE.

A modern diesel engine requires about 15,000 liters of air – for each liter of fuel that is burned! DEUTZ Air Filters provide

reliable filtration of combustion air, preventing that dust can enter the engine and cause increased wear and fuel consumption, loss of performance and higher emissions. The perfect protection for your engine.

The engine company.

### THE BENEFITS OF BUYING DEUTZ:

- **Highest degree of filter fineness**  
Secure filtration of dirt particles in the micrometer size range
- **Filter medium with impregnation protection and high tear strength**  
Extended filter life time and prevention of cracks in the filter medium
- **Optimum folding geometry**  
Large amount of paper can be fitted into a very small space – allows for high dirt holding capacity and durability as well as optimum filtration throughout the entire change interval

- **Special paper embossing and creasing**  
Ensures sufficient distance between pleats – the filter surface is available for dirt absorption for the entire duration of the air filter interval
- **Neatly produced and glued bellow ends**  
High filtration level and reduced wear

**DEUTZ Air Filters provide optimal protection, consistent engine performance and low fuel consumption – the perfect match for your engine!**

### Extensive product range.

DEUTZ offers an extensive product range of air filter inserts for different engines and applications. Your DEUTZ service partner will be pleased to advise you!
