

GENUINE DEUTZ OIL FILTER

Optimum protection for your DEUTZ engine!

Genuine DEUTZ Oil Filters ensure that your engine is optimally supplied with oil at all times – for cold starts, frequent restarting, operation at low load and at high temperatures.

Clean engine oil is essential for preserving the performance and reliability of your engine.

This is why you should rely exclusively on high-quality genuine parts when it comes to replacing the oil filter.

Genuine DEUTZ Oil Filters provide reliable filtration and protect the engine from wear and damage caused by dust, soot and other particles.

The benefits of buying DEUTZ

- **Large filter surface and consistently high filtration efficiency:**
High dirt capacity and optimum filtration performance throughout the entire service interval.
- **Precisely opening overflow valve:**
Ensures sufficient supply of oil even when the maximum filter capacity is reached and prevents premature opening on the valve – a common problem with low-quality filters.
- **Corrosion resistant housing with**
high compressive strength and high quality seals offer safety and protection against leakage.
- **High tear resistance of the filter medium:**
Prevents tearing and entry of unfiltered oil into the engine.
- **Special coating:**
Protection against water and aggressive chemical components of the oil – prevents filters from becoming prematurely brittle or clogged.
- **Anti-drain lock:**
Prevents the filter from draining when the engine has been switched off, thus ensuring sufficient oil is available when restarting.

- 1 Gasket
- 2 Anti-drain lock
- 3 Filter housing
- 4 Center tube
- 5 Filter medium
- 6 Overflow valve
