

DEUTZ ALTERNATORS AND STARTERS

High reliability and long service life!

High-quality, durable starters and alternators are a basic requirement for the high reliability of a DEUTZ engine.

With the Genuine DEUTZ starter DEUTZ offers a powerful electric engine for reliable engine starting and the Genuine DEUTZ alternator ensures a highly efficient conversion of mechanical into electrical energy.

Genuine DEUTZ Alternators

The alternator is the key component for the reliability of the engine`s electrical system. To ensure a long lifetime and to reduce operating costs, DEUTZ alternators are made using high quality internal components including low-wear brushes and bearings. Our alternators are designed and rigorously tested to withstand the severest conditions when it comes to climate, dust and vibration – to provide a stable power supply under all conditions

The advantages of Genuine

- High efficiency
- Excellent and stable power supply under all operation conditions
- High reliability and long lifetime

Genuine DEUTZ Starters

High quality starters are essential to meet the performance needs of your DEUTZ engine. For this reason, genuine DEUTZ starters are designed and rigorously tested to ensure each one can start a minimum of 30.000 times, in a wide range of temperatures between – 33 °C and 135 °C. A high dust and water protection class ensures optimum functioning even under toughest conditions, while brushes with optimized wear properties allow for long lifetime. The perfect start for your engine!

The advantages of Genuine

- Excellent cold crank capability and highpower output
- High dust and water protection class
- High reliability and long lifetime

Genuine DEUTZ Alternators and Starters are also available as Xchange Parts.
