

PRESSE RELEASE

DEUTZ takes a stake in TYTAN and enters into a strategic partnership with drone specialist

- DEUTZ and TYTAN Technologies agree on a strategic partnership to develop modern energy and drive solutions for drone defense
- DEUTZ's participation in the current financing round emphasizes the long-term cooperation

Cologne, February 24, 2026 – DEUTZ, a system supplier of innovative and sustainable mobility and energy solutions, has agreed a strategic cooperation with TYTAN Technologies for the development and industrialization of innovative energy and drive technologies for drone defense systems, as announced by both companies today.

“With the partnership and investment in TYTAN Technologies, we are further strengthening our position as a provider of modern drive and energy systems in the defense sector. TYTAN Technologies contributes outstanding expertise in AI-supported drone defense. As an industrial partner, we support the development, industrialization, and integration of complex drive and energy systems – always with the aim of bringing new technologies into series production quickly,” says Dr. Sebastian Schulte, CEO of DEUTZ AG. “The acquisition of drive specialist SOBEK and the strategic partnership and stake in ARX Robotics have already made this clear.”

As part of the partnership, the companies intend to collaborate on providing suitable drive solutions for interceptor drones, on the development and supply of modular, decentralized energy systems and battery systems for launcher applications, as well as on the assembly and final acceptance of technical subsystems.

In addition, DEUTZ has also taken a financial stake in TYTAN Technologies, thereby underlining the long-term importance of the collaboration. Through this investment, DEUTZ further strengthens its position in the growing market for unmanned defense systems.

Balázs Nagy, CEO & Co-Founder of TYTAN Technologies, adds: “DEUTZ will support us with industrial expertise and capacities to secure our supply chain within Europe and to further ramp up production. We firmly believe in the synergies that arise from working with a strong industrial partner like DEUTZ”.

With this agreement, DEUTZ is further expanding its activities in the field of security- and defense-relevant mobility and energy solutions. The company has many years of experience in the development of robust drive systems, mobile power generation, energy storage, and the industrial implementation of complex technical solutions and is already supporting armed forces worldwide in ensuring operational readiness.

About DEUTZ AG

DEUTZ AG has evolved in recent years from a manufacturer of conventional engines into a system provider for innovative and sustainable mobility and energy solutions. Founded in 1864 in Cologne, where it is still based today, DEUTZ is the world's oldest engine company. The development, production, and marketing of high-performance drive systems for off-highway applications remains at the heart of its operations. DEUTZ is also playing its part in the transition to more sustainable transportation and power supplies by offering alternative drive solutions and decentralized energy and power generation systems. DEUTZ solutions are used in a wide range of applications, including construction equipment, agricultural machinery, material handling equipment such as forklift trucks and lifting platforms, stationary equipment such as generator sets (gensets), and commercial and rail vehicles. The broad-based product portfolio is complemented by an extensive service offering that encompasses maintenance and repair work, the supply of spare parts, and remanufacturing. This is being continually expanded with the addition of digital, data-driven services. With around 1,000 sales and service locations in over 120 countries, DEUTZ offers its customers an integrated range of products and services from a single source. DEUTZ employs more than 5,500 people worldwide and generated revenue of approximately €1.8 billion in 2024. Further information is available at www.deutz.com.

About TYTAN Technologies

TYTAN Technologies is a deep-tech company based in Munich with a clear mission: to protect European airspace from drones through cost-effective, scalable, and autonomous solutions. TYTAN is building Europe's next-generation air defence architecture: scalable, software-defined, and networked. By combining state-of-the-art AI, modular and cost-efficient hardware, and deep system integration, the company is well on its way to becoming a global leader in autonomous air defence. TYTAN offers affordable protection against unmanned threats – made in Germany, to restore Europe's resilience.
