DEUTZ strengthens NewTech presence: Urban Mobility Systems and Futavis renamed DEUTZ NewTech

- Urban Mobility Systems and Futavis will operate under the new DEUTZ NewTech company names
- Focus on battery systems, software solutions, and electrified powertrains
- NewTech activities become clearly recognizable as part of DEUTZ

Cologne, July 1, 2026 – As part of its “Next DEUTZ” strategy, DEUTZ is systematically advancing its transformation towards sustainable and future-proof drive solutions. A key element of this transformation is the creation of a unified, clearly recognizable NewTech presence. Against this backdrop, two companies that already belong to DEUTZ AG are being renamed with immediate effect:

- The electrification specialist previously known as Urban Mobility Systems B.V. will now operate under the name **DEUTZ NewTech Netherlands B.V.** The Dutch company has already successfully electrified more than 300 machines including excavators, wheel loaders, and cranes, and has built a strong position as an innovation and technology leader for battery-electric drives for off-highway applications.
- Futavis GmbH, based in Aachen, will become **DEUTZ NewTech GmbH**. As one of Germany’s leading providers and development experts for battery management systems and battery technology, the company focuses on the development of modular scalable battery systems. The core element of its customer-specific batteries is the company’s proprietary Battery Management System (BMS).

Both companies belong to the Business Unit NewTech and work closely with various DEUTZ locations on the development and industrialization of battery systems, software solutions, and electrified powertrain concepts.

PRESS RELEASE

“With the new company names, we are making visible what has already become reality in our daily business: we work as a one NewTech team across locations on shared products and solutions,” says Bert van Hasselt, CEO of the Business Unit NewTech. “The former individual company brands will become less prominent, while our technology and system expertise under the name ‘DEUTZ NewTech’ move even more into the spotlight.”

Futavis GmbH has been part of DEUTZ since 2019. Urban Mobility Systems has been integrated into DEUTZ since 2025. Both companies are part of the Business Unit NewTech and have played a key role in building up the NewTech portfolio in recent years.

“In future, our customers will see even more clearly that all NewTech activities are part of DEUTZ – with a shared understanding of quality, a common technology roadmap, and a consistent service philosophy,” van Hasselt adds.

For customers and partners, the renaming will not fundamentally change the existing collaboration. The existing points of contact will remain available as before.

About DEUTZ

DEUTZ has evolved in recent years from a manufacturer of conventional engines into a system provider for innovative and sustainable mobility and energy solutions. Founded in 1864 in Cologne, where it is still based today, DEUTZ is the world's oldest engine company. The development, production, and distribution of high-performance drive systems for off-highway applications remains at the heart of its operations. DEUTZ is also playing its part in the transition to more sustainable transportation and power supplies by offering alternative drive solutions and decentralized energy and power generation systems. DEUTZ solutions are used in a wide range of applications, including construction equipment, agricultural machinery, material handling equipment such as forklift trucks and lifting platforms, stationary equipment such as generator sets (gensets), and commercial and rail vehicles. The broad-based product portfolio is complemented by an extensive service offering that encompasses maintenance and repair work, the supply of spare parts, and remanufacturing. This is being continually expanded with the addition of digital, data-driven services. With around 1,250 sales and service locations in nearly 180 countries, DEUTZ offers its customers an integrated range of products and services from a single source. DEUTZ employs around 6,000 people worldwide and generated revenue of just over €2.0 billion in 2025. Further information is available at www.deutz.com.
