

DEUTZ AG Prototypes Request for quotation

Dear Sir or Madam,

We kindly ask you whether you can manufacture the part/s requested in the e-mail in accordance with our drawing and enclosed technical documents.

If you have any questions regarding technical clarifications, please contact the indicated technical engineer directly. Drawings, files, and parts lists are attached to this letter. In case of questions regarding the standards, in-house standards, and specifications, you can contact the responsible material planner.

The measurement report relating to the order quantity must be sent before the dispatch of the goods to our quality e-mail address: pt-teilequalitaet.de@deutz.com

Unless otherwise required, the measurement report must be prepared according to the following scale:

- 1 - 10 pieces** = **100%** measurement
- 10 - 50 pieces** = start, middle and end of production **3 pieces each**
- > 50 pieces** = **3 pieces** at the start of production and then after every **50 pieces**, and **3 pieces** at the end of production

The exact required quantity of measurement reports will be indicated by the material planner in our RFQ.

If deviations from the target specifications are identified prior to dispatch, these must be sent to the e-mail address: pt-teilequalitaet.de@deutz.com using the deviation protocol (see cover sheet "deviation protocol"). In this case, please wait for the decision of our design department how to proceed.

If the requested part can be manufactured by you according to our specifications, we kindly ask you to send us an offer with graduated prices such as 1-5; 6-10 and 11-20 parts and including the expected delivery date after receipt of order.

For the shipping, a disposable packaging can be selected, which must protect the material against moisture/rust, dirt, and damage.

We thank you in advance for your efforts and prompt feedback.

Yours sincerely

DEUTZ AG Prototype management
